Emergency Admitting Form

Name: Baby Boy Smith

Age: Unborn on presentation; 36 weeks gestation

Sex: Male

Method of Transportation: Private car

Person giving information: A well dressed man runs into the ER yelling that his wife is giving birth in their car in the ambulance bay.

Presenting complaint: The newborn needs to be successful delivered then resuscitated

Background: No chart or vital signs will initially be available. When you go to the car you find a woman in the passenger's seat, with a baby crowning. She does not know when her water broke and appears to have altered mental status. Her duration of labor and other past medical history are unknown at presentation.

Triage or Initial Vital Signs

BP: 40/p

P: 50

R: 0

T: 97°F
