

Hypertensive disorders in pregnancy

Management Plan

Name:

Date:

1. Gestational hypertension

1.1 Antepartum

What will be your treatment plan and considerations towards medication? Include how frequent you want to see your patient and what check-ups are needed at these antenatal visits.

1.2 Intrapartum

What do you have to consider for delivery? What will be your intrapartum management? What complications should you pay attention to?

1.3 Postpartum

What will be your postpartum management? Are there specific drugs that need to be avoided? How should you counsel women on the chances of developing hypertension later on in life?
