

Intro to Obstetrics: Simulation Workshop

Pre- and Post-test

1. What is the definition of labour and how does it differ from "false labour"?
2. List 3 ways in which ruptured membranes can be confirmed.
3. List 3 indications for cesarean section.
4. What are 2 ways in which labour can be induced and/or augmented?
5. List 3 features of a normal fetal heart rate tracing.
6. Name 2 blood tests you would order for a patient with suspected pre-eclampsia.
7. List 3 things you might consider to manage shoulder dystocia.
8. List 3 methods of pain control in labour.
9. What is the definition of dystocia in the first stage of labour?
10. What are 3 prerequisites for an assisted vaginal delivery?
11. What are 3 things you could do to manage post-partum hemorrhage?
12. List 2 complications of artificial rupture of the membranes.
13. What are 3 risk factors for post-partum hemorrhage?
14. List 3 factors that predispose to shoulder dystocia?
